FULL-STACK ENGINEER

Full-stack engineer focused on building data-aware systems with clean architecture, responsive interfaces, and reliable APIs. With a background in data analysis and digital marketing, I connect product decisions to instrumentation, experimentation, and measurable outcomes. I'm actively building AI-enabled products using modern LLM frameworks and protocols (e.g., LlamaIndex, MCP) to solve concrete user problems end to end.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: React, Next.js, Context API, Vite, Tailwind, BEM
Backend & APIs: Node.js (Express), Python (FastAPI, Flask), REST
Databases: PostgreSQL, Async PyMongo, MongoDB, SQLAlchemy, Prisma
AI / LLM: LangChain, LlamaIndex, OpenAI API, Vector DBs, Model Context Protocol (MCP), prompt engineering
Data & Analytics: Pandas, NumPy, scikit-learn, Matplotlib, Tableau
Cloud & DevOps: AWS (studying for Developer Associate), Google Cloud, Vercel, Docker
Automation & Tooling: Zapier, Make.com, n8n, Git/GitHub, Selenium, Beautiful Soup, Playwright
Business & Design: Canva, Figma, Advanced Excel/Google Sheets

Selected Projects

Human Upgrade Platform — Biotech Knowledge Base + LLM Research System

Tech: TypeScript, GraphQL (Apollo), MongoDB, Redis, Python (async), LangGraph, AWS (CDK, ECS, Lambda, SQS, S3)

- Built a multi-service biotech knowledge platform with state-aware ingestion pipelines and LangGraph research/enrichment workflows, serving structured episode + entity data through a production-grade GraphQL API (TypeScript/Apollo, Python async, MongoDB, Redis, AWS CDK/ECS/Lambda/S3).

System Hub (All Repos): https://github.com/Overton77/human-upgrade-system

Human Upgrade API: https://github.com/Overton77/humanupgrade-api

GoWipe — E-commerce Website + Analytics Instrumentation

Tech: Shopify, JavaScript, Google Tag Manager, Google Analytics

- Built and deployed a Shopify e-commerce site with custom front-end enhancements. Implemented end-to-end conversion racking by wiring custom Shopify Events through Google tag into Ads and Analytics

PROFESSIONAL EXPERIENCE

GoWipe Co — Digital Marketer / Web Developer
Jan 2021 – Dec 2025
• Built and maintained the Shopify storefront; shipped targeted theme/code customizations to improve UX. • Authored e-commerce event-tracking and integrated with Google Tag Manager to unify ads/analytics signals. • Led keyword research and on-page SEO; produced visual assets (Canva) and automated social posting. • Combined AI tooling with human edits to scale content; streamlined multi-app workflows via Zapier.

Tip Top Capital — Sales Rep / CRM Specialist
Apr 2019 – Dec 2021
• Populated and quality-checked Salesforce during rollout (1,500+ contacts) and improved data hygiene.
• Coordinated with marketing on tailored pitches; managed large lead lists.
• Implemented email-response flows and strategy automations with human validation to lift outreach efficiency.

Landtech Data Corporation — Administrative Assistant / CSR
Jun 2016 – Mar 2019
• Executed data entry/validation with ~99% accuracy across client records.
• Built Excel macros to automate recurring reports (≈5 hours/week saved).
